Subject: Mike asked for latest Form R's - attached

These forms show amounts of the specified chemical released to air, and, and water, as well as amounts waste managed, e.g. sent off-site to a RCRA landfill.

and in section 8.8 there is accidental releases – if these chemicals were released in this accident – then these amounts should show up on 2017 reports – due July 1, 2018

Only 4 chemicals reported in 2016 – there could be others not required to be reported.

We are sure Crosby for there are other TRI reporters in Region 6
